📞 727-623-1819 ✉ vctrnssr@gmail.com 📍 St Petersburg, Florida

SUMMARY

Motivated and adaptable professional with a strong background in sales, management, and full-stack software development. Recent hands-on experience building and deploying production web applications for business operations, specializing in C#, Blazor, and Linux-based hosting. Adept at gathering requirements, leading projects from concept to launch, and delivering scalable technical solutions that drive business success.

EXPERIENCE

Software Developer / Dispatcher

Tow Boat U.S.

📅 2025 - Present 📍 Seminole, United States

TowBoatUS is a leading provider of on-water towing, assistance, and salvage services for recreational and commercial boaters throughout the United States.

- Developed a custom full-stack "Salvage Tracker" web application for internal use, modeled after monday.com, using Blazor (C#) for the front end and SQLite for the database.
- Gathered requirements, managed the entire development lifecycle, and implemented user-friendly features for dispatch and salvage job management.
- Deployed and self-hosted the application on-site using a Linux server, including configuring the hosting environment for reliability and security.
- Supported internal staff with troubleshooting, training, and feature enhancements, directly improving company workflow efficiency.
- Balanced software development duties with daily dispatch operations, demonstrating high independence and strong problem-solving skills.

Full Stack Developer (Contract)

Pinellas Nutrition

📅 2024 📍 Remote

Local nutrition shop that offers a wide menu of high protein smoothies, desserts, and supplements.

- Designed and built a full-stack online ordering platform for a local smoothie shop, utilizing Blazor (C#) for the front end and SQLite for the back end.
- Integrated Stripe for secure online payments and implemented a dynamic menu and cart system, allowing customers to order and pay online.
- Built a real-time order management dashboard for restaurant staff, including automated updates and notifications for new orders.
- Collaborated closely with business owners to gather requirements, deliver solutions, and provide technical support post-launch.
- Delivered a production-ready, self-hosted solution, demonstrating strong technical ownership and cross-functional communication skills.

STRENGTHS

🚩 Analytical and Problem-Solving Skills

Capable of breaking down complex challenges to identify root causes and implement effective, data-driven solutions.

⚡ Teamwork and Collaboration

Skilled in fostering positive team dynamics and working collaboratively to achieve shared goals in diverse environments.

★ Action Oriented

Proactive and results-driven, consistently taking initiative to deliver outcomes efficiently.

SKILLS

| Management | | Problem Solving | |
